

Billing & Subscriptions

How is billing calculated?

Subscriptions are billed monthly in advance, on the calendar day matching the original signup date. If a plan is upgraded mid-cycle, the price difference is prorated for the remainder of the current billing period and charged immediately; downgrades take effect at the start of the next billing cycle, with no partial refund for the current period.

What happens if a payment fails?

A failed payment triggers three automatic retry attempts over 7 days, spaced 48 hours apart. If all three retries fail, the account is downgraded to the free tier and an email notification is sent to the account owner. No data is deleted when an account is downgraded this way; it is simply access-limited until payment succeeds.

Account Management

How many team members can I add?

The Starter plan supports up to 5 team members. The Professional plan supports up to 25 team members. The Enterprise plan has no fixed team member limit and is billed per active seat instead.

How do I transfer account ownership?

Account ownership can be transferred from the account settings page by the current owner. The new owner must already be a member of the team with at least Admin role, and must accept the transfer within 7 days or the transfer request expires automatically.

API Rate Limits

What are the API rate limits?

The Starter plan is limited to 60 API requests per minute. The Professional plan is limited to 600 requests per minute. The Enterprise plan defaults to 6000 requests per minute, with higher limits available on request.

What happens when a rate limit is exceeded?

Requests beyond the limit receive an HTTP 429 response with a Retry-After header indicating how many seconds to wait before retrying. Rate limits are enforced per API key, not per account, so multiple keys on the same account each get their own independent limit.

Data Retention

How long is data retained after account deletion?

When an account is deleted, all associated data is retained in encrypted backups for 30 days to allow for accidental-deletion recovery, then permanently purged. During those 30 days, data can only be restored by contacting support directly; there is no self-service restore option.

Are deleted documents recoverable before the 30-day window closes?

Yes. Support can restore an individual deleted document, or an entire deleted account, at any point within the 30-day retention window. After 30 days, the underlying encrypted backup is destroyed and recovery is no longer possible.
